Cars are valuable machines that help us to travel from place to place. Our parents look after their cars, by using just the right type of fuel, making sure there is oil in the engine, water in the radiator, good tyres on the wheels and proper seat belts or car seats to protect us.

Our bodies are also valuable machines that are worth a fortune! Do you look after your body carefully? Our bodies need the right type of fuel (good food), plenty of water, exercise to tone the muscles, rest and sleep in order to repair and keep it in good working order and protection from things that would destroy.

Alcohol, tobacco and other drugs do not belong in the body. These things only destroy something that is valuable. Don't trash your treasure! Remember that you are of great value and you need to protect your body from damage.

People who use drugs, not only destroy their bodies, but they also end up with lifestyles that take away their happiness, their good looks and their beauty. Determine today to look after your special machine - your body - so that it does not end up wrecked and beyond repair. Find the way through the maze, unscramble the words and discover the key to a NEW START for your life!
